

## **Field Service Technician**

Location: Sheffield, South Yorkshire  
Job Type: Permanent  
Salary: Salary Package will be commensurate with the position and responsibility.

### **Background**

RE Field Services Ltd, a leading provider of support to users of High Voltage, Motors, Generators now have an immediate vacancy for a Field Service Technician. The successful applicant will join the Field Services Team, and will work both within the Sheffield works and in the field. The role will involve travel both within the UK, offshore and overseas as required.

### **Key Responsibilities**

- Reporting to the Works Supervisor perform an extensive range of mechanical and electrical maintenance activities on a large range of electrical machines both on site, in works & overseas.
- Accurate recording of results.
- Drafting of clear and concise technical reports.
- Fault finding and emergency call out site support on Generators and Motors.

### **Key Qualifications and Experience**

- Proven track record of conducting mechanical and electrical maintenance activities including machine stripdown, Winding Inspections, Bearing Inspections, repairs & overhauls of High Voltage Rotating machines within a similar motor/generator service or manufacturing environment.
- Educated to ideally HNC/HND level or time-served apprenticeship in a relevant engineering or technical discipline.
- Able to read, interpret and follow engineering drawings.
- Have practical experience of maintenance of large electrical machines.
- Knowledge and experience of working to engineering standards/product specifications.
- Able to comply with all the organisation's policies and procedures, with specific reference to the Health, Safety & Environment, at all times.
- Self-motivated with a high regard for safety and quality.
- Fluent English speaking with good verbal, computer and written skills.
- Highly organised and able to work with minimal supervision or within multi-skilled team.
- Familiarity with a range of different industrial applications would be advantageous.
